

Program Educational Objectives (PEOs)

Environmental Engineering

Within a few years of graduation alumni of the Environmental Engineering Program will:

- A. Function successfully in a professional environment by utilizing and enhancing their problem-solving and communication skills.
- B. Continue learning through graduate or other professional education and obtaining licensure where appropriate.
- C. Promote organizational success with consideration of cost and time management, and demonstrate global and societal awareness, while practicing and promoting ethical behavior and stewardship of a sustainable environment.
